Hi There ! My name is Dewald, I am an aspiring Software & Web Developer from Pretoria, South Africa. I have a passion for problem solving and using the advanced technologies available today to do just that. I am a fast learner and extremely eager to improve in every aspect of development every single day. I have a strong aversion to doing something with only partial effort. I really enjoy the satisfaction that comes with solving an intracate problem. I'm eager to begin making contributions to projects and real world problems.
